P R E F A C E

This issue is the second of the series and it covers statistics, based on several departmental publications, for the decennium ending with the year 1340 F. (1931 A.D.). The special feature of the edition is the increased number of tables amounting to 256, as against 74 tables of the preceding issue. Statistics from some departments have not been received hence they are not found here. The delay in publishing this book was due to some departments who were not prompt in furnishing the required material. Statistics relating to 1341 to 1344 Fasli will be published in the "Year Book" for 1344 Fasli to be revised annually and to take the place of the decennial Statistical Abstract.
